

# Advanced Vehicle Stabilization and Extrication

## Concepts and Applications for Heavy Vehicles

6<sup>th</sup> Annual Program being held in Carroll County, Maryland  
November 6<sup>th</sup> through November 8<sup>th</sup>, 2015

This highly sought after program is again being offered in central Maryland. This 2+ day program, developed and taught by Mid-Atlantic Technical Rescue, has become extremely popular in the region. Focusing on large vehicles such as tractor trailers, dump trucks, cement mixers, etc., the course shows you how to mitigate these difficult scenarios without the aid of heavy tow trucks and wreckers.

The program begins with an evening slide show covering the technical aspects of big trucks (weight, terminology, etc.), basic physics principles of rescue, cribbing systems and shoring techniques, etc. Then the next two full days are spent rotating through four difficult and challenging scenarios with various "large and heavy" vehicles. Participants will utilize multiple types of rescue equipment and techniques to mitigate these scenarios. Unlike other programs that focus strictly on tow trucks or single tool techniques, this course shows multiple ways to accomplish your extrication goals using what you carry on your rescue vehicles.

*Listen to what others had to say in prior years:*

- *"This is by far the best rescue training I have ever received"...Carroll Co. Md.*
- *"Scenarios were very challenging and very realistic...what an awesome experience"...Frederick Co. Md.*
- *"This course should be mandatory for all rescue squad officers...it will be for mine"...Wash. Co. Md.*

### Additional Information

- This is a free seminar. Union Bridge VFD is sponsoring this course and allowing you to attend for free.
- New Windsor VFD is hosting the program at their station and activities center and providing lunch.
- Friday hours are 1830-2200, Saturday/Sunday hours are 0700-1700, all at New Windsor Fire Station #10 located at 110 High Street, New Windsor, MD 21776
- To register and reserve your spot, please call Chief Chad Green of the UBVFD @ (443) 340-9422 or email him @ [GreenChief8@AOL.com](mailto:GreenChief8@AOL.com)
